SOLUTION OVERVIEW

THE PROBLEM

Today's SMB owners and IT Leaders are faced with ensuring security, compliance and must allocate the necessary resources for optimal performance and the growth of their business. All of these issues fall under IT and they are too complicated and costly for many SMB's to deal with on their own. This is especially true for companies that operate within regulated industries who are under increasing pressure to deliver data security, communications and compliance. For them, "the Cloud" looms only as a daunting undertaking rife with risks and unknowable costs.

Infrastructure providers, like Amazon, promote the benefits of moving to the Cloud, but what they don't tell you is that they are only getting you part of the way toward solving the challenges your business must address. The crisis begins when you spend money on Cloud solutions that don't live up to your expectations making this whole topic very "cloudy".

THE SOLUTION – NuveStack's Cloud-IT™

NuveStack helps you rise above the clouds, solving your IT problems, freeing up IT resources and delivering what everyone else promised the Cloud could be. We created Cloud-IT™ – the world's first comprehensive Cloud-based IT service that gets your business out of IT for one fixed "no surprises" monthly subscription. Stop wasting time and money managing local workstations or trying to build your own Web Applications, Data Storage and Data Bases. Our proprietary software platform – NuveCenter™ - solves these IT problems and delivers them all from the worlds fastest cloud infrastructure. Let NuveStack get you out of IT, reduce operating costs and help you rise above the problems getting in the way of your business.

PROBLEM

Need Security, Compliance and Management for all your End Users, workstations, desktops & Apps as a service now?

Tired of CAPEX spending for new hires or your annual workstation refresh cycle and want to shift to an OPEX model?

Want dramatic cost savings and to get out of managing Servers, Data Bases and Back End Apps?

Do you need a Disaster Recovery Plan now? Do you need to go further and Disaster-Proof your business?

Got Cloud Printing pain?

Hate paying for IT resources to restart routers or trouble shoot local network issues?

SOLVED BY NUVESTACK

▶ **Security and Compliance as a Service** – NuveStack cloud based workstations, desktops and Apps protect your business and ensure you will never manage, update or repair another PC again.

▶ **Cloud Ready Zero-maintenance End Points** – NuveStack's low-cost end points require no configuration and no local maintenance. Just turn it on and login to your NuveStack cloud-based desktop.

▶ **Fully Managed Servers, Databases & Back-end Apps** – The NuveStack Performance Design is the fastest cloud infrastructure in the world. NuveCenter deploys, manages, monitors and patches server operating systems and dynamically allocates the resources you need when you need them.

▶ **Fail Over & Geo-Redundancy** – With NuveStack, your data is replicated in real time across geo-redundant data centers over a dedicated, private fiber optic ring allowing for NuveStack's high-availability virtual servers to be quickly live-migrated and avoid service disruptions. Only NuveStack can disaster-proof your business.

▶ **Managed Cloud Printing** – NuveStack's fully managed cloud printing solution enables any user with any device to print to any of your organization's printers with ease from any physical location.

▶ **NuveStack Manages it All For You** – LAN's, Firewalls, Routers, Switches and WiFi access points. You define the security, best practices for your business and we will deliver them, monitor and enforce your policies so you can rest easy. We've got your back.
